

HANA MIGRATION "kick-start"

SAP S/4 HANA

Prepare For The Digital Economy With SAP S/4HANA

You are not alone if you have difficulty in translating "journey to S/4HANA" marketing with the actual practicalities of getting this initiative off the ground for your SAP environment. You may have been live on SAP for years and wonder how you could ever progress to S/4HANA without it breaking the bank.

The G3G "Kick-start" Offer

G3G offers a fixed price engagement to build a proof of concept to accelerate your decision making process for adoption of S/4HANA. This includes all SAP HANA licenses, infrastructure and consulting services. Depending on the scope of your existing environment, and a number of other factors, G3G may recommend an upgrade and database migration OR a fresh install with data migration.

Engagement Objectives:

- Provide you with a technically upgraded S/4HANA solution (based on a copy of your environment)
- Provide a recommendation on whether to perform an S/4HANA upgrade or a fresh install and migration based on the cost, risk and technical feasibility
- Propose a digital transformation roadmap for your business based on S/4HANA innovations

Engagement Process:

- You provide us with a homogenous copy of your existing SAP system and we will re-platform in G3G's Private Secure Private Cloud
- Perform the necessary upgrade steps to prepare your solution for S/4HANA
 - Unicode conversion (if required)
 - EHP8 upgrade and HANA database migration
- Install S/4HANA 1610
- Provide a custom code analysis report using G3G's Custom Code Crawler to assess impact on existing custom code
- Hand the system back to your team to test your existing processes to assess the impact of the technical upgrade
- Provide an SAP S/4HANA Innovation Discovery report based on your existing environment to facilitate the discussion around adopting S/4HANA innovations

G3G also offer a "try before you buy" S/4HANA Best Practice Solution for your familiarisation on a simple monthly rental model.
